DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-11, the prior art does not teach or fairly suggest a camera with an exposure control system or exposure control method which forms first exposure information which is incremented or decremented in units of predetermined steps and second exposure information using the image signal output from a solid-state image sensor and a predetermined optimum value and selects the first exposure information for generating timing signals when the image signal falls outside of a predetermined range or selects the second exposure information for generating timing signals when the image signal falls within the predetermined range as claimed. While it is known to use different exposure control methods depending on the brightness of an image (see for example Masanaga) and to increment and decrement exposure information when an image signal falls outside of a range (see for example Mochizuki), the claimed system and method is not described in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
